
SynCon® TRK 4, TRK 4-FS and TRK 10

Attributes

TRK terminals can be selectively snap mounted on the 2 x 10mm or 2 x 35 mm mounting rail and bobbins with integrated mounting compartments. In addition to the ground terminal block, all insulation housings have a covering flap. This reveals the lateral open solder hook to facilitate the insertion and soldering of winding ends and subsequent fingerproof covering in compliance with VBG 4. This type covers the cross-sectional range up to 10mm². With the exception of the TRK 10, the terminals are available with screw or screw and slip-on connections.

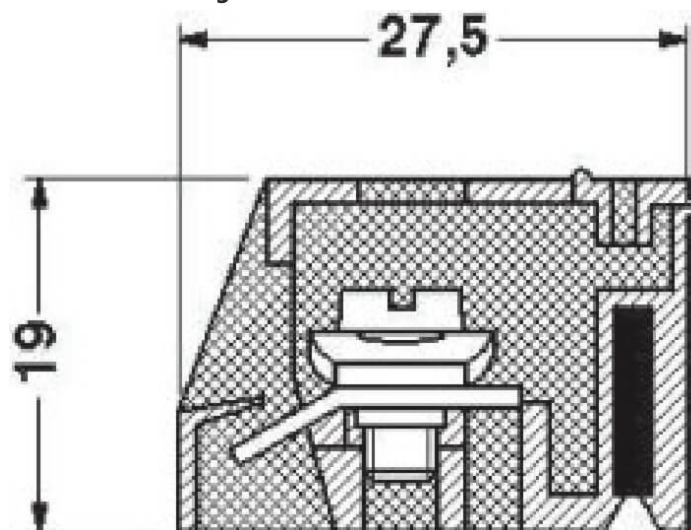

The TRK 4-SL yellow/green ground terminal block can be harmoniously connected to the remaining terminal types. It is screwed to the laminated core together with the mounting rail.

All TRK terminals are designated with the marker pin BN-TRK.
